

# Cleaning and Decontamination Log, Pre-amp room

At a minimum cleaning will entail the following:

- All counter tops cleaned with a solution of bleach or approved substitute (i.e. Dispatch)
  - All extraction hoods cleaned with a solution of approx. 10% bleach or approved substitute (i.e. Dispatch) followed by an ethanol wipe down
  - All centrifuges cleaned with a solution of approx. 10% bleach or approved substitute (i.e. Dispatch) followed by an ethanol wipe down
  - Replace sticky floor mats at both entry doors to the lab.
  - Decontaminate the epMotion deck with Decon Quat, followed by 70% ethanol
  - All QiAcubes cleaned with Decon Quat, followed by a water wipe down
  - All pipettes cleaned with Decon Quat, followed by an ethanol wipe down (Note: Do not spray pipettes directly, spray Decon Quat onto a kimwipe and use the kimwipe to clean the pipettes)
  - All door knobs, lab chairs, carts, pens, and telephones, freezer and refrigerator doors/handles, mouse, keypad, cabinet and drawer handles cleaned, with a solution of approx. 10% bleach or approved substitute (i.e. Dispatch)
  - Used lab coats to laundry
  - Run maintenance procedure on Hamilton STARlet (called weekly maintenance on desktop)
